## **H** Joseph Brant Hospital Burlington, Ontario

The Joseph Brant Hospital (JBH) project comprises the addition of a 7-storey, 172-bed, patient care tower, and extensive renovations to the existing hospital. The new tower was built to create a main entry facing east towards the lake and is connected to the new parking garage structure by a transparent footbridge. The project includes: expanded intensive care, diagnostic imaging, cancer clinics and ambulatory care programs; a modern emergency department; new main entrance; 9 modern ORs; post-anaesthetic care unit; and a renovated Level 2 Special Care Nursery.

JBH is nestled between views of Lake Ontario and the Niagara Escarpment. The hospital was designed to leverage its unique and bucolic location to improve the quality of patient care. A series of well-crafted environments was designed within and around the hospital, enhanced by the connection to the natural environment, both visually and physically. 75% of the patient rooms have lake views; the remainder have views to the Niagara Escarpment. Roof areas visible from patient rooms are dressed with a multilayered, green-roof system. Public spaces, such as the main lobby and cafeteria, offer views of the lake and JBH's cherished "Protected Wood Lot," as well as direct access to the landscaped forecourts, the dining terrace, and the healing gardens.
